

CCTV Remote Monitoring Service

Full Support for **Center V2** Features including **2-Way Audio, PTZ Control & Image Storage.**

Central Monitoring Services

Full remote monitoring by trained central station Security Officers who will be able to take the appropriate remedial action (in accordance with client's instructions), such as calling the Police and Fire Authorities or a key holder.

Remote Monitoring Packages

Remote Monitoring – Gold **34.00 per month**

Full remote monitoring of external and/or internal cameras triggered by traditional motion sensors. We will take the appropriate remedial action (in accordance with your client's instructions), such as calling the Police and Fire Authorities or a key holder when suspicious activity is observed. Using this service enables you to offer a service to your client of potentially preventing crime instead of just simply recording it!

Remote Monitoring – Silver **19.00 per month**

As for Gold except all the remotely monitored cameras are indoors and the area is normally completely quiet of movement during the period when remote monitoring takes place. internal video motion sensing system will then be permitted to be used as long as, again, a high level of activity is not created by the system.

48 Hour Remote Monitoring – Bronze **.02Cents per MB**

If your CCTV PC was stolen or damaged then all your evidence could be irretrievably lost. Instead, have all the images leading up to the event safely backed up and stored on our high speed and high capacity servers.

The Bronze Level Remote Monitoring package offers you a connection to our central station for automated offsite image backup.

No operator is involved; this is a fully automated process. No action will therefore be taken by anyone if images show suspicious activity.

Contact Details: Contact [RIMS](#) for more information on getting your Surveillance System Remotely Monitored.
